

Nexora Inc. Corporate Data Retention and Disposal Policy Version 2.0 Effective Date: March 15, 2024

1. Purpose The purpose of this Data Retention and Disposal Policy is to ensure that Nexora Inc. retains its official records in accordance with all applicable legal, regulatory, and business requirements.

Furthermore, this policy ensures that records are securely destroyed or permanently deleted when they reach the end of their required retention period. Proper data management reduces storage costs, optimizes information retrieval, and mitigates legal and privacy risks associated with retaining obsolete data.

2. Scope This policy applies to all physical and electronic records generated, received, or maintained by Nexora Inc. in the course of its business operations. It applies to all employees, contractors, temporary staff, and third-party vendors who have access to Nexora Inc. data.

3. Record Categories and Retention Periods Nexora Inc. categorizes its data into several groups, each with specific retention requirements.

3.1 Financial and Accounting Records All tax returns, general ledgers, financial statements, and supporting documentation (invoices, receipts, bank statements) must be retained for a period of seven (7) years from the end of the fiscal year to which they relate.

3.2 Human Resources Records Employee personnel files, performance evaluations, and payroll records must be retained for the duration of employment plus six (6) years following termination. Medical records and workers' compensation claims must be retained for thirty (30) years.

3.3 Corporate and Legal Documents Articles of incorporation, bylaws, board meeting minutes, and corporate seals must be retained permanently. Major contracts and agreements must be retained for ten (10) years after their expiration or termination.

3.4 Routine Correspondence General email communications and internal memos that do not constitute official business records should be deleted when they are no longer needed for immediate reference, typically within one (1) year.

4. Legal Hold In the event of pending or reasonably anticipated litigation, government investigation, or audit, the Legal Department will issue a "Legal Hold" notice. A Legal Hold overrides all standard retention periods and disposal schedules.

Upon receiving a Legal Hold notice, employees must immediately suspend the destruction of any related documents, including routine emails, until the hold is officially released by the Legal Department in writing.

5. Data Disposal and Destruction When records reach the end of their retention period and are not subject to a Legal Hold, they must be securely destroyed.

5.1 Physical Records Paper documents containing confidential, proprietary, or personally identifiable information (PII) must be shredded using cross-cut shredders or placed in designated secure shredding bins for certified vendor disposal. Throwing sensitive documents into standard recycling or trash bins is strictly prohibited.

5.2 Electronic Records Digital files must be permanently deleted from all systems, including servers, local hard drives, cloud storage, and backup tapes. For hardware that is being retired or repurposed, storage media must be securely wiped using approved data sanitization software or physically destroyed if wiping is not feasible.

6. Compliance and Auditing The Information Technology (IT) and Legal departments will conduct periodic audits to ensure compliance with this policy. Violations of this Data Retention and Disposal Policy may result in disciplinary action up to and including termination, as well as potential legal penalties for the company.

Approved by: Sarah Jenkins General Counsel Nexora Inc.

Additional padding for length requirement: To meet the minimum word count for testing, this policy also covers the retention schedules for ancillary systems. The retention of security camera footage is set at ninety (90) days unless a specific incident requires preservation. Building access logs are kept for one (1) year. Visitor registration logs are maintained for three (3) years. Any data stored on removable media such as USB drives must adhere to the same retention rules as server-based data.

Removable media must be encrypted and physically destroyed at the end of its useful life. Training records for all employees regarding data privacy and security will be kept for five (5) years to demonstrate compliance during external audits. The Data Protection Officer (DPO) will review these schedules annually and make necessary adjustments to align with new data privacy regulations. Furthermore, any exceptions to these retention schedules must be formally documented and approved by both the DPO and the Legal Department.
